ABOUT US

Atagem Group was founded in 1993 to engage in shipbuilding and repair, along with surface cleaning, preparation, and paint applications within industrial facilities.

Since the 2000s, our company has concentrated on international projects and has established itself as a leader in the sector by executing successful initiatives in the TRNC, Kazakhstan, Turkmenistan, Georgia, Mexico, and Belgium.

Atagem Group prioritizes occupational health and safety in alignment with ISO 45001 standards. Our team of certified experts provides implementation services, along with auditing and consulting.

FACILITY**

**MAINTENANCE OF INDUSTRIAL
FACILITIES CHEMICAL, OIL, TANKS
AND SPECIALIZED STORAGE
AREAS**

**MAINTENANCE OF
SUSPENSION BRIDGES,
BRIDGES, AND OVERPASSES**

**SURFACE PREPARATION AND
PAINTING APPLICATION IN SHIP
MAINTENANCE AND CONSTRUCTION**

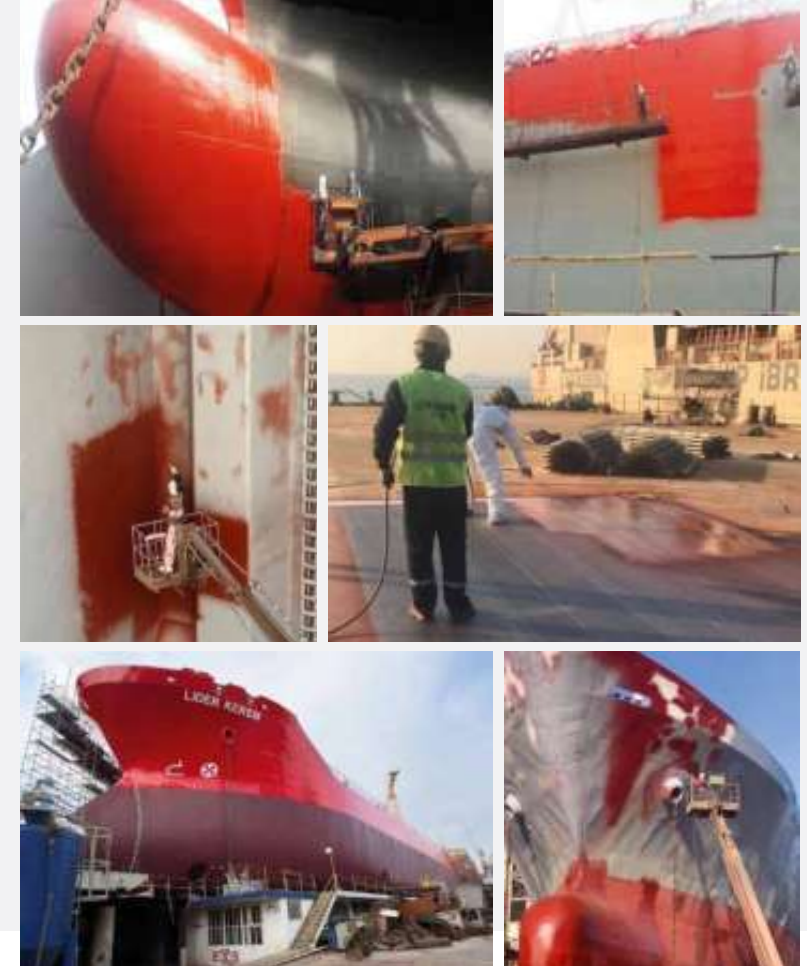

SURFACE PREPARATION, BLASTING, AND PAINTING ACTIVITIES IN THE NEW CONSTRUCTION AND REPAIR OF VESSELS

As part of our periodic maintenance program for ships of all types and tonnages, spanning both 2.5 and 5-year intervals, Atagem Group specializes in surface preparation, which includes washing, mechanical cleaning, and grit blasting. We also apply paint to decks and interior and exterior surfaces, ensuring compliance with international standards and ISO regulations.

Our maintenance and painting procedures are consistently applied within the tanks and holds of chemical tankers and dry cargo vessels, adhering to paint plans tailored specifically to the cargo type.

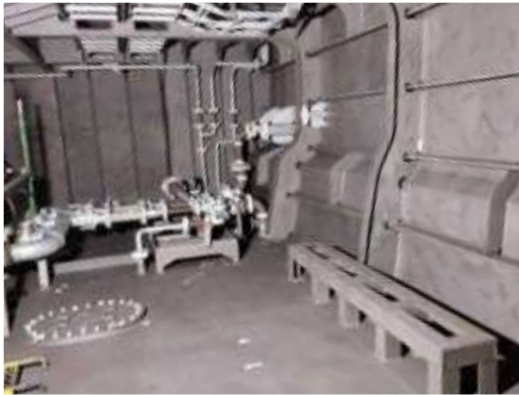

Operating from Tuzla and Yalova shipyards, as well as various locations throughout Turkey and internationally, Atagem has established itself as a leading brand in the maritime sector. We are renowned for our modern equipment, secure scaffolding systems, and highly skilled personnel.

✓ CORPORATE GOVERNANCE

Atagem emphasizes the importance of corporate governance for sustainable growth and strong customer relationships. The company aims to expand both domestically and internationally, adapting to global standards to enhance governance effectiveness. Respecting social and national values, Atagem acknowledges its responsibilities and seeks to pass its values to future generations, focusing on customer satisfaction.

✓ CORPORATE POLICY

To ensure safety and environmental excellence, a management system promotes continuous improvement. All risks are assessed, essential preventative measures are taken, and readiness for emergencies is prioritized. Practices are enforced to boost safety and environmental awareness among staff, while management proficiency is continually improved.

✓ OUR MISSION

Our business activities are carried out within a professional and corporate framework, following ethical standards and fully complying with safety, environmental, life and property safety, and health regulations. Our objective is to create a model management and operational system that attains safety and environmental excellence.

✓ OUR VISION

By embracing the philosophy of zero accidents as a way of life and integrating this principle with professionalism, Atagem will emerge as a leader in the national market and a respected, trustworthy business on the international stage.

OCCUPATIONAL HEALTH AND SAFETY POLICY

Human health is paramount in the workplace, with strict adherence to occupational safety regulations. Safety is prioritized on construction sites, ensuring no compromises. All safety systems and equipment are functional and regularly inspected, with a focus on safety topics during training activities.

ENVIRONMENTAL CONSERVATION POLICY

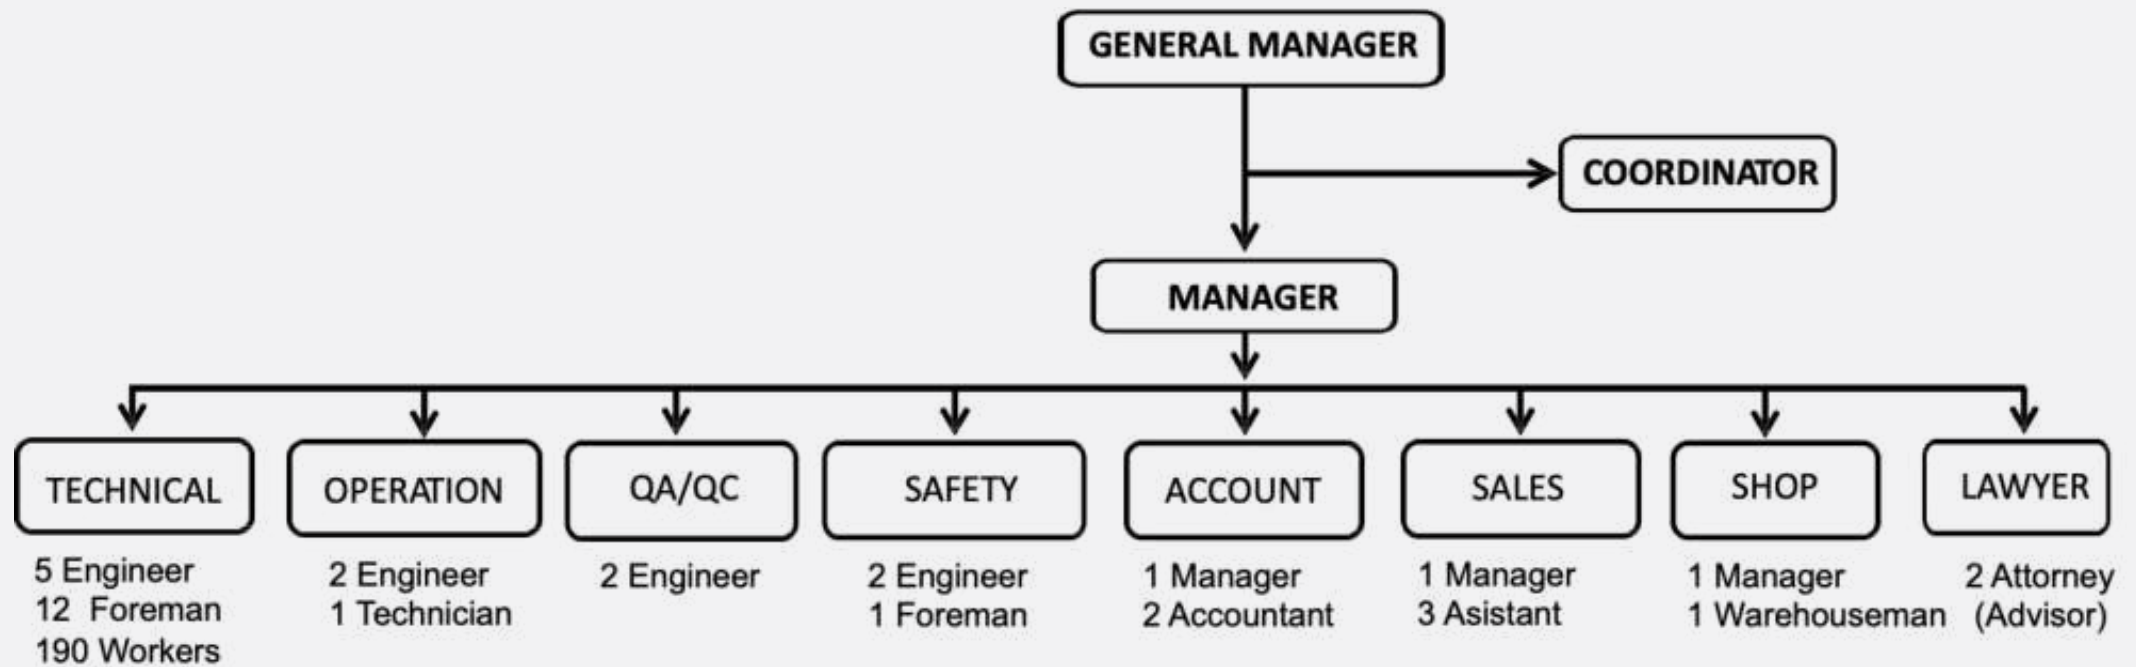

An environmental management system is established to prioritize and enhance environmental protection. It ensures compliance with national and international regulations while proactively addressing regional risks, particularly concerning the Black Sea and air pollution. Employees' environmental responsibilities are clearly defined, and staff with strong environmental awareness are hired. Training standards are regularly updated, and risk assessments are conducted at every stage, with preventative measures implemented.

COMPANY GUIDELINES

Maintenance and repairs of machinery follow the ISO 9001 Quality Management System, ensuring continuous safety and environmental protection. Spare parts inventory is maintained above essential thresholds, and long-term preventive maintenance strategies are prioritized over short-term fixes. Comprehensive safety measures are applied throughout the maintenance process, using original or equivalent spare parts to prevent malfunctions.
